

Gov **BANKV**

Connect ChatGPT to Gov BANKV

A simple, step-by-step picture guide. In about 2 minutes, you'll give ChatGPT live access to all 27 of your Gov BANKV government-contracting tools.

★ 5 EASY STEPS · ~2 MINUTES

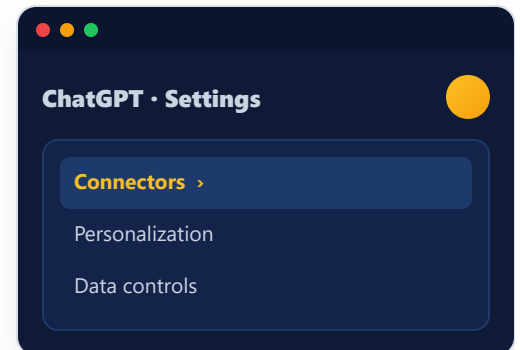

Before you start

- **ChatGPT with connectors** — custom connectors are available on paid plans (Plus / Pro / Business / Enterprise). You may need to turn on `Settings → Connectors → Advanced / Developer mode` to add a custom one.
- **Your Gov BANKV access token** — in the Gov BANKV app go to `Settings → MCP Access → Generate Access Token` and copy it (shown only once).
- **The connector address** (Step 2):
`https://mrgovcon.co/mcp`

1 Open ChatGPT's Connectors

In ChatGPT, go to **Settings** → **Connectors**. If you don't see a way to add your own, enable **Advanced** / **Developer mode** there first.

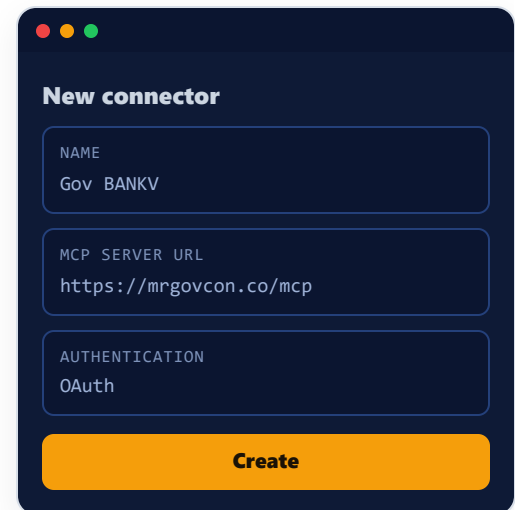

Connectors are saved to your account — you set this up once.

2 Add a custom connector

Click **Add custom connector** (or "Create"). Enter:

- **Name:** Gov BANKV
- **MCP Server URL:** `https://mrgovcon.co/mcp`
- **Authentication:** OAuth.

New connector

NAME
Gov BANKV

MCP SERVER URL
`https://mrgovcon.co/mcp`

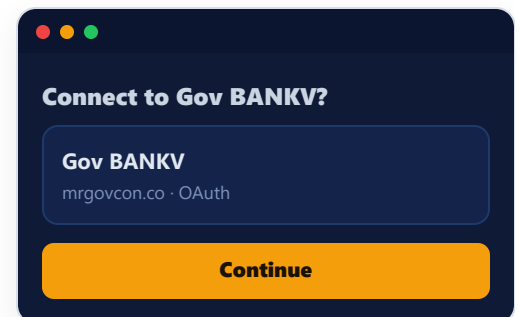

AUTHENTICATION
OAuth

Create

3 Approve the trust prompt

ChatGPT will show a one-time notice that you're connecting a third-party tool. Confirm to continue — it then sends you to the Gov BANKV sign-in page.

You're only ever connecting to **mrgovcon.co**, your own platform.

Connect to Gov BANKV?

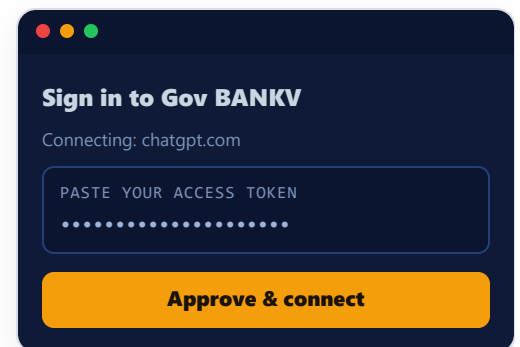

Gov BANKV
mrgovcon.co - OAuth

Continue

4 Paste your access token

On the Gov BANKV sign-in page, **paste your access token** (from "Before you start") and click **Approve**.

This is the one-time OAuth sign-in — ChatGPT never sees your password.

Approve & connect

5 You're connected — try it

Done — ChatGPT can now use all **27 Gov BANKV tools**. In a chat, enable the Gov BANKV connector and ask, e.g.: *"Use Gov BANKV to show my top open opportunities."*

If something goes wrong

- **"Something went wrong with setting up the connection"**: ChatGPT often caches a half-finished connector. **Delete the connector completely** (don't just retry it), then add it again from scratch and finish the sign-in.
- **Still failing?** Try the all-in-one URL instead: <https://mrgovcon.co/all/mcp>
- **Token rejected / needs a token**: generate a fresh one in [Settings → MCP Access → Generate Access Token](#) and paste the latest.
