

Gov **BANKV**

Connect Perplexity to Gov BANKV

A simple, step-by-step picture guide. In about 2 minutes, you'll give Perplexity live access to all 27 of your Gov BANKV government-contracting tools.

★ 5 EASY STEPS · ~2 MINUTES

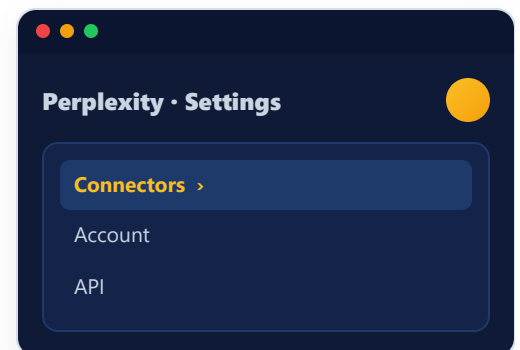

Before you start

- **A Perplexity paid plan** — custom connectors require **Pro, Max, or Enterprise**.
- **Your Gov BANKV access token** — in the Gov BANKV app go to [Settings](#) → [MCP Access](#) → [Generate Access Token](#) and copy it (shown only once).
- **The connector address** (Step 2):
<https://mrgovcon.co/mcp>

1 Open Perplexity's Connectors

Click your **profile** → **Account Settings** → **Connectors**.

Connectors are saved to your account — set up once.

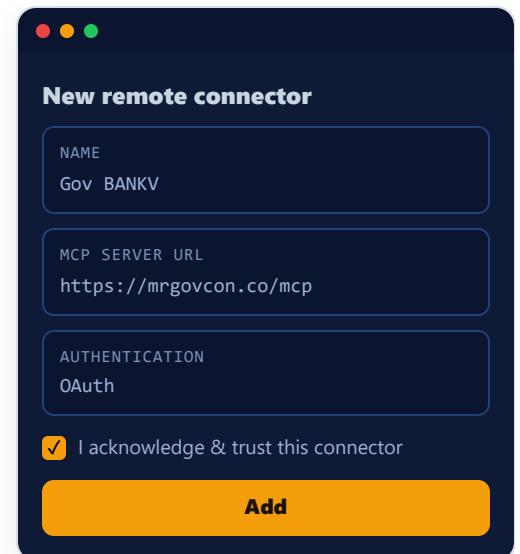

2 Add a custom remote connector

Click + **Custom connector**, then choose **Remote**. Fill in:

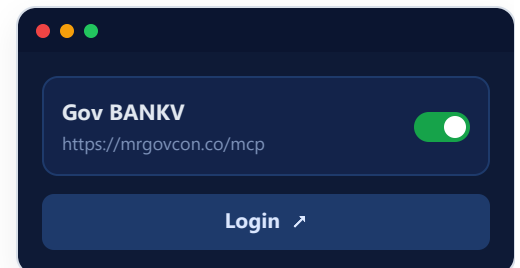

- **Name:** Gov BANKV
- **MCP Server URL:** `https://mrgovcon.co/mcp`
- **Authentication:** OAuth.

Check the **acknowledgement box** and click **Add**.

3 Enable it & sign in

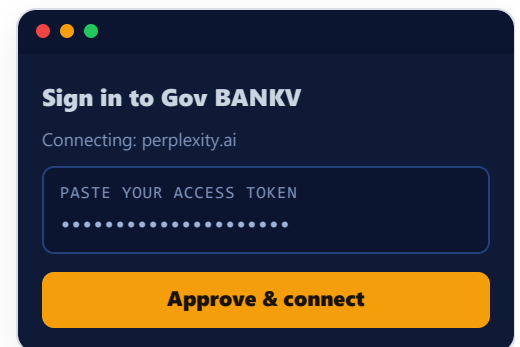

Click the new **Gov BANKV** card to turn it **on**, then click **Login**. A Gov BANKV sign-in page opens.

4 Paste your access token

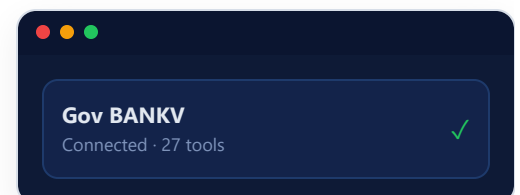

On the Gov BANKV sign-in page, **paste your access token** and click **Approve**.

One-time OAuth sign-in — Perplexity never sees your password.

5 You're connected — try it

Done — Perplexity can now use all **27 Gov BANKV tools**. Ask, e.g.: *"Use Gov BANKV to show my top open opportunities."*

If something goes wrong

- **Don't see "Custom connector":** it requires a Perplexity **Pro, Max, or Enterprise** plan.

- **Error mentioning "client_secret":** this is a known Perplexity-side quirk with public connectors — not a problem on the Gov BANKV side. Email support@mercyraine.com and we'll help.
- **Token rejected:** generate a fresh one in [Settings → MCP Access → Generate Access Token](#) and paste the latest.
